Letter of Guarantee/Certification

This letter is to guarantee that all of PBFY Flexible Packaging products meet the requirements of the FDA for food application. All layers of materials used including aluminum foil, poly, and inner/outer linings are free of fungicide, preservatives, fumigants and plasticizers. This letter also certifies that BPA (Bisphenol A) and DEHA (Bis(2-ethylhexyl) adipate) are not present in any of the materials used in manufacturing our premade bags and film. All packaging materials being used are safe for direct contact with food.

Our entire production team is required to wear hairnets and gloves when work requires them to handle the bags prior to shipment (i.e. valve, tin tie, label or hang hole application). This ensures our products are always in a clean and uncontaminated condition. A final inspection by our Quality Assurance Team ensures that maximum precautions are taken to ensure integrity of all the products we supply to our customers.
